San Diego Gas Electric Summer 2026 Internship Program For Students

Description

Welcome to the sunny city of San Diego, where innovation meets sustainability. Nestled along the breathtaking California coastline, San Diego is home to a vibrant community and a commitment to clean energy. At the forefront of this mission is San Diego Gas & Electric (SDG&E), a leading utility company dedicated to delivering reliable power while embracing a greener future. Join us as we explore the exciting opportunities and unique experiences that await those who embark on a career with SDG&E.

As an SDG&E team member, you'll play a crucial role in powering one of the most beautiful cities in the world. Your work will involve ensuring the reliable delivery of electricity and natural gas to homes, businesses, and critical infrastructure throughout San Diego County. With a strong focus on sustainability and environmental stewardship, SDG&E is committed to reducing greenhouse gas emissions and promoting renewable energy sources. By joining our team, you'll contribute to the vital task of building a cleaner, brighter, and more sustainable future.

Responsibilities

As a member of SDG&E, your responsibilities will encompass a wide range of tasks. You'll be involved in monitoring and maintaining the electrical grid, responding to power outages, and addressing customer inquiries and concerns. Collaborating with colleagues and stakeholders, you'll help develop strategies for improving energy efficiency and implementing innovative technologies. Additionally, you'll participate in community outreach programs, educating the public about energy conservation and the benefits of renewable resources.

Qualifications

To qualify for a position at SDG&E, certain criteria must be met. A bachelor's degree in engineering, environmental science, or a related field is typically required, although equivalent experience may be considered. Strong analytical skills, attention to detail, and problem-solving abilities are essential. Excellent communication and interpersonal skills are also important, as you'll be working with diverse teams and engaging with customers on a regular basis.

Experience

While specific experience requirements vary depending on the role, a background in the utility industry or related fields can be advantageous. Previous experience in power systems, renewable energy, or grid operations is highly desirable. Familiarity with regulatory requirements and knowledge of industry best practices will also be valuable assets in contributing to SDG&E's mission.

Skills

At SDG&E, we value a diverse range of skills that can help drive innovation and foster a sustainable energy future. Some of the key skills that are highly sought after include proficiency in data analysis and modeling, knowledge of power system operations, and an understanding of renewable energy technologies. Strong project
